## University of Nottingham Queens Medical Centre

**Working as part of a design team which included the University of Nottingham Estates & Catering teams, quantity surveyors and site project teams, our scope of work was to provide a full fit out front of house including servery counter, bespoke seating area's, screen dividers to break up the space, feature bookcase and provision of all loose furniture.**

We were briefed to transform the university's relocated cafeteria from a traditional canteen into an experience that competes with the high street. The space provides opportunities for students, staff and the general public to sit in and dine in a variety of appealing settings, from bespoke fixed seating with individual feature study pods to lounging soft seats and industrial style benching and general furniture.

### **The works comprised:-**

- Close collaboration with the client and design team.
- Construction of the servery counter with Corian top.
- Construction of bespoke feature bookcase.
- Supply of decorative metal screens.
- Bespoke fixed seating units and eclectic industrial style furniture.
- Site installation.
