Steel City House

Sheffield based Scotts Developments had consulted us at a very early stage in the design process about providing a key element to one of Sheffield's landmark buildings "Steel City House".

Upper most in their thoughts was creating an eye catching reception counter that was the focal point for the grade II listed art deco style development. The design had to fuse together seamlessly the proud industrial heritage of this fabulous building and provide the most impressive office space in the city—no pressure then... but the results are simply stunning and the client's extremely pleased with the finished article.

The works comprised:-

- Close collaboration with the client.
- Construction of the reception desk in Hi-Macs.
- Opal, with Corian Blueberry Ice lettering.
- Walnut veneer worktop.
- Colour changing LED specialist lighting.
